Respected Sir/Madam.

I am writing to express my interest in the Software Engineering Winter Intern Role. I'm in my fourth year of a Bachelor of Engineering in Information Technology program at the Vivekanand Education Society's Institute of Technology. Mumbai. I've spent the last two years working with Full Stack Web Development across multiple frameworks.

My current employment as Software Development Intern at Star Union Daichi Life Insurance has allowed me to refine my backend programming, testing/maintenance, and cooperation skills, as well as establish solid expertise in MERN Stack, Flask, and Next.js. I also work in the field of Machine Learning and have won numerous hackathons using these skills. I am eager to bring these skills to a new challenge and take on the responsibilities that come with the Software Engineering Winter Intern role.

I am certain that I will be a benefit to your organization. This work would offer me valuable experience in designing and managing apps in a production setting, which would be useful in my future career. I've included my resume, which illustrates my interest in technology and everything that it entails. I appreciate your time and care in reading this letter, and I look forward to the opportunity to further explore my qualifications.

Sincerely,

Sarvesh Patil
